App Inventor 2 Databases And

App Inventor provides two components to facilitate database activity: TinyDBand TinyWebDB. TinyDBis used to store persistent data directly on the Android device; this is useful for highly personalized apps where the user won't need to share her data with another device or person, as in No Texting While Driving.

Working with Databases - Appinventor

App Inventor 2: Databases and Files is a step-by-step guide to writing apps that use TinyDB, TinyWebDB, Fusion Tables and data files for information storage and retrieval.
