Area of a circle is the region occupied by the circle in a two-dimensional plane. It can be determined easily using a formula,  $A = \pi r^2$ , (Pi r-squared) where r is the radius of the circle. The unit of area is the square unit, such as  $m^2$ ,  $cm^2$ , etc.

Since the base of parallelepiped is in the shape of a parallelogram, therefore we can use the formula for the area of the parallelogram to find the base area. Area of Parallelogram = Length  $\times$  Height; Lateral Surface Area (LSA): Product of perimeter of the base and the height of the 6 parallelograms faced prism.
