In mathematics, the limit of a function is a fundamental concept in calculus and analysis concerning the behavior of that function near a particular input. Formal definitions, first devised in the early 19th century, are given below. Informally, a function f assigns an output $f(x)$ to every input x . We say that the function has a limit L at an input p , if $f(x)$ gets closer and closer to L as x moves closer and closer to p . More specifically, when f is applied to any input ...
