long strands which spiral to produce a structure known as the double-helix which resembles that of a ladder wherein the sugar and phosphate molecules form the sides while the rungs are formed by the bases.

DNA vs RNA - Introduction and Differences between DNA and RNA

Acces PDF Dna And Rna Answers

DNA vs RNA. The difference between DNA and RNA explains the reason why DNA serves as the genetic material instead of RNA. By comparing DNA and RNA, it is evident that both the nucleic acids are able to replicate. Stability is an important criterion for continuity. DNA fulfils this criterion. This point was proved in Griffith's experiment.

The phosphate-ended extremity is called a 5'-extremity and the pentose-ended extremity is called a 3'-extremity.

Therefore, DNA or RNA chains can have a 5'-3' or 3'-5' direction. These directions are important for several biological functions of DNA and RNA,
