Notice the counter shading. One side is darker then the other. 2) Notice and label on the squid diagram the chromatophores.

## **Squid dissection - SHEDD AQUARIUM**

Squid are marine mollusks that have a reduced internal cartilaginous structure called a pen. Like all mollusks, a squid has a soft, unsegmented body. It also has body plan in which it s head is located between its "foot" and its "body." In this case the foot is modified into tentacles and arms to aid in capturing prey.

### **marine bio squid dissection Flashcards | Quizlet**

Orient the squid so that the tentacles are away from you, at the top of the dissection tray. Spread out the arms, tentacles, and fins. Draw and label the external parts of the squid: arms, tentacles (have suckers only at the tips), head, eyes, fins, mantle, funnel, tail, suckers, beaks (where each would be found on an intact squid) and mouth.

### **Squid Dissection - BIOLOGY JUNCTION**

Let's squid! What: Squid Dissection ; When: Now! Concepts: anatomy, marine biology ; Cost: ~\$0.20 per squid ; Materials: Squid (smaller ones are actually easier for dissection, many East Asian grocery or seafood stores will have them) Tools: Nitrile or latex gloves ; Tweezers ; Cutting tool (we use a razor blade here) Magnifying glass (optional)

### **Squid Dissection : 11 Steps (with Pictures) - Instructables**

Our summer campers had been honing their observation and inquiry skills all week long in our brand new “Marine Biology Afoot and Afloat” camp. The squid dissection was the final activity of the week, and students were eager to show off what they’d learned ...and to get a little messy. I set the foundation for the large dissection by spending an hour leading the students through dissecting their very own 15 cm long market squid.
